CURRICULUM AND METHODOLOGY

Primary Section (Grade 1 - Grade 4)

The primary curriculum of VIBGYOR High is based on the ideas, theories and practices prevalent internationally. Our dedicated curriculum team incorporates these ideas, theories and practices within the learning objectives and standards set out by relevant authorities.

The curriculum encourages social development, technical skills and a sound knowledge base. In each grade students are exposed to a broad range of historical, scientific, and cultural topics that complement each other to prepare them for academic success in the future. VIBGYOR High tries to develop cultural literacy in a way that is systematic but leaves room for creativity for both teacher and student. This curriculum eliminates the lacunae and repetition that characterize a curriculum which is based on text books and traditional teaching methods. The latest teaching methodologies and pedagogies are incorporated to effectively deliver the curriculum and create an ideal environment for learning.

Assessment system

The assessment in primary section is informal and continuous based on a combination of "in class" observations and inspection of formal work done by the children. The assessments will evaluate the level of skill achievement and attainment of learning goals for each subject as well as the social cultural development of the children. The assessment criteria fulfill recommendations laid down by the CICSE and CIE. At this stage the school does not follow a ranking system. Progress reports of the child will be discussed and handed over during PTMs. Final report cards will only be issued at the end of the academic year.

Secondary Section (Grade 5 - Grade 10)

The curriculum in the secondary section is more specific and focussed. The various aptitude and strengths of individual students are further identified and honed, thus they are encouraged to focus on their areas of interest and skills, thus preparing them for future challenges and the relevant certification. The curriculum is enhanced with teaching aids and experiential learning through projects and field work.

Assessment system

The assessment system in the secondary section moves to a formal examination system. The formal assessment is introduced in Grade V. The system will evaluate skills achieved and attainment of learning goals for each subject. The assessment criteria fulfill all the recommendations laid down by the CICSE and CIE. The school does not follow a ranking system. Progress reports of the child will be discussed and handed over during PTMs. Final report cards will only be issued at the end of the academic year.

Sports and Performing Arts (SPA) - Primary and Secondary School

VIBGYOR High is one of the few schools in the country that has a structured curriculum for Sports & the Performing Arts which includes in-class and out-of-class experiences. The SPA curriculum is integrated with all other cross-curricular activities. The aim of the programme in the Primary section is to expose children to various sports and performing arts thereby identifying their individual aptitude and interest. The programme is also designed with the intention of developing age specific skills in the child and brings about awareness of various activities thus promoting self confidence. Trained coaches for various sporting activities instruct and guide the children in all activities. In the Secondary section the children are encouraged to focus and excel in specific disciplines. The spirit of competition is encouraged and children are exposed to various tournaments and competitions.
